MY PASSCODE TO THE RECORDING DOESN'T WORK

Copying and pasting passcodes may be convenient, but sometimes add unnecessary spaces before and/or after the exact code. If you receive an error, try typing in the passcode manually.

Passcodes contain a word + a random special character + random numbers. Here are some past examples.

Richter#0109

Papyrus#103

VOWELS#1012

BEAVER#105

Chicago1.9.23

Please remember that your Zoom link and passcode are specific to your email address and may not be shared.
